## Summary

Java Developer with a strong foundation in Core Java, Object-Oriented Programming, SQL, and Web Technologies. Skilled in developing, debugging, and optimizing applications to deliver efficient and scalable solutions. Interested in contributing to innovative projects and working in dynamic development environments.

## Skills

**Programming & Querying:** Java, SQL, Python

**Data Visualization Tools:** Advanced MS Excel, Power BI, Tableau

## Experience

### Java Developer Intern

August 2025 – September 2025

Codec Technologies AICTE approved(Remote)

Tools Used: Eclipse, NetBeans, MySQL

- Developed and optimized backend processes to handle 100,000+ records, improving system performance and reducing processing time.
- Designed reusable modules and automated workflows using Java and SQL, reducing manual effort by 40% and improving operational efficiency.

### Python Developer Intern

July 2024 – August 2024

Elewayte(Remote)

Tools Used: Jupyter Notebook, SQL

- Processed and standardized 100,000+ records using Pandas and NumPy, improving data accuracy and analysis efficiency.
- Built automated scripts and reusable modules, reducing data processing time by 30% and minimizing manual errors.

## Projects

### Crime Management System | Java

August 2025 – September 2025

- Created a Java-based application to manage crime records, including FIR details, criminal information, and case status tracking.
- Implemented Object-Oriented Programming concepts and integrated with a database using JDBC for efficient data handling.
- Configured modules for data entry, search, update, and report generation to streamline case management.
- Enhanced system efficiency by ensuring secure data storage and quick retrieval of records through optimized logic.

### Farm Management System | Python Flask

July 2024 – August 2024

- Implemented a web-based farm management system using Python Flask to manage crop details, farmer data, and resource allocation.
- Modeled and integrated database models to store and retrieve data efficiently for farm operations and monitoring.
- Built user-friendly interfaces for adding, updating, and tracking farm activities, improving usability and accessibility.
- Executed features for monitoring crop status and resource usage, enabling better decision-making and farm productivity.

## Awards & Certifications

- Google Data Analytics Certificate – Coursera (2024):** Completed 8 practical case studies involving SQL, dashboards, and presentations.

## Education

### B.E in CSE

STJIT(VTU), Ranebennur

Graduated: 2027

CGPA: 8.9 / 10

### PUC (Science)

SCRPU College, Honnali(Shivamogga)

Completed: 2023

Percentage: 89%
